

BMC Outdoor First Aid Course

Shadwell, London

26-27 October 2019

COURSE INFORMATION

Course Overview

First Aid in the Outdoors rarely occurs in helpful or accessible locations. This 2 day course is suitable for anyone who works in, or takes part in, leisure activities in remote locations. The training and scenarios involved are based on situations that arise when you are more than just a few minutes away from help and will equip you to manage first aid, potentially for up to several hours whilst waiting for a rescue team to arrive.

This is a 16 hour (2 day) certified Outdoor First Aid course. The course would start at 8.30am each day and finish by 5pm. Students would receive a First Aid certificate which is valid for three years and is recognised by all the NGB awards (including MLTB). There is an emphasis on the Outdoors and First Aid in the mountains but this course is geared more towards

On both days, please bring suitable old clothing, which will keep you warm, dry and comfortable whilst being mock casualties in the outdoors.

Location

The course will be run from the Mulberry and Bigland Green Centre, Richard Street (off of Bigland Street), London, [E1 2JP](#)

Shadwell train station is less than 10 minutes walk away which is served by London Overground and DLR.

Car parking is available

No overnight accommodation is provided for this course. There are hotels in the area for those who require it.

Price

£50 per person for the whole weekend

Included: instruction on both days, certification, group/first aid equipment

Not included: meals, personal equipment, transport

To secure your place please click to [book online](#) via the BMC website, or follow the link on the course information page – www.thebmc.co.uk/clubs/courses

Level of experience

This course is relevant to anyone who needs to revalidate a 16 hour certificate for their NGB Awards such as the Mountain Leader or Rock Climbing Instructor but it is equally as valid to someone with no previous first aid experience or training.

Course Outline

Although a syllabus will be followed there may be some tailoring for people's needs. The course aims to be practical, hands-on first aid, with no difficult medical jargon. We use a systematic approach to help people deal with emergencies.

This course will concentrate on most of the major life-threatening illnesses and injuries in the mountains and on Basic Life Support.

Principles of First Aid

Vital Signs: what signs should be present in a healthy person. What are the 'warning' signs in a casualty?

Accident Procedure/Body Examination:

- Approach Procedure
- DR ABCDE
- Safe Airway Position
