

GB Climbing

Annual Overview of Anti-Doping Activities

Clean Sport Education Strategy and Implementation Plan

Under the new Assurance Framework, GB Climbing have been working in partnership with Mountaineering Scotland to create a new Education Strategy. The first draft of the Education Strategy has been completed and we have received some feedback which will be acted upon before the second draft is submitted.

Education

We completed Clean Sports 1 ahead of the Tokyo Games. The Prohibited List has been shared with all current athletes and we are working on a social media plan to spread key anti-doping messages throughout the year.

Compliance

We have provided evidence against most of the UKAD Assurance Framework requirements and some of the evidence has been approved by UKAD. We are awaiting the approval of the remaining evidence submitted against the Assurance Framework requirements.

Testing

1 July – 30 September 2021, during this time, the domestic and international Anti-Doping Testing Programme carried out 2233 tests.

GB Climbing had four tests in the full year (2021). All the results returned were negative.
