

## On the doorstep, ask your party candidates and canvassers these questions:

Better access to green space could save the NHS billions. We are calling for a long-term strategy on outdoor recreation that cuts across party lines.

**What is your party doing to tackle the epidemic of inactivity, which costs an estimated £10 billion a year?**

In the English countryside, walkers spend over £6 billion a year & support 245,000 full time jobs. We want the outdoor economy to be supported with the investment it deserves.

**What is your party doing to support the outdoor economy?**

We want planning guidance strengthened to recognise that beauty & wildness are more important than inappropriate developments.

**Do you think the right balance has been struck in this area between planning & protecting our countryside?**

We want to ensure our mountains, countryside, national parks & green spaces are not jeopardised by further cuts.

**If you/your party were elected, would you look to spend more money on improving & maintaining rights of way & access infrastructure?**

The countryside is a great treasure on our doorstep that has the potential to transform lives, improve health & generate wealth.  
Let's make the outdoors for everyone.

**Do you know of any barriers in this constituency which may deter people from getting outdoors?**

**Election 2015:  
Vote for the Outdoors**

# Ways to get involved

Get your candidates involved:  
quiz them about local issues, talk to them on  
your doorstep, invite them to attend a local  
BMC area meeting
